

I MADE WINAYAGATAR ARYA BHANU

AI Full-Stack Developer & Automation Engineer

Tabanan, Bali, Indonesia
+62 813-3810-9102 | winayaarya@gmail.com | wyna.dev | github.com/ryuken25

SUMMARY

Information Systems graduate (S.Kom, ITB STIKOM Bali, 2026) and freelance full-stack and automation developer since 2023. Seven web apps live in production on Vercel with Neon and Supabase Postgres, and 50+ automation bots delivered for clients. Daily stack: TypeScript with Next.js and React, Node.js, Python with FastAPI, PostgreSQL, and LLM APIs (OpenAI, Claude, Gemini) for extraction and agent workflows. I design the system, read the diffs and run the deploys. Looking for an AI full-stack or automation role in Malaysia.

CORE SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL
Web: React, Next.js, Vite, Node.js, FastAPI, Tailwind CSS, REST APIs, Prisma
Data: PostgreSQL (Neon), MySQL, Supabase, schema design and migrations
AI & automation: LLM APIs (OpenAI, Claude, Gemini), agent tool calling, prompt engineering, Playwright scraping, Telegram and web bots, scheduled jobs
Delivery: Git/GitHub, Vercel, Cloudflare, secrets hygiene, staged releases, browser QA

EXPERIENCE

Freelance Full-Stack & Automation Developer Independent 2023 - Present | Bali, Indonesia

- Build and run client web apps, scraping pipelines and internal tools, from requirements through deploy and support.
- Seven products live in production on Vercel with Neon and Supabase Postgres, all still maintained after handover.
- Delivered 50+ automation bots in Python, Node.js and Playwright for bulk processing, Telegram and web flows, and multi-account operations.
- Use LLM APIs for structured extraction and agent workflows; output is reviewed before it reaches a user.

Full-Stack Developer & Video Editor (contract) Mellogang Visuals 2025 | Bali, Indonesia

- Sole developer on two builds for the same studio. The site now live: a portfolio of film and stills, Indonesian and English copy, light and dark themes, and a booking form that hands off to WhatsApp.
- Separately for the same client, an ordering and production-tracking app: Admin, Editor and Client roles, OTP and Google OAuth sign-in, payment verification, shoot scheduling and PDF invoices.
- Stack: PHP with CodeIgniter 4 on MySQL, Bootstrap and jQuery views; the studio site is hand-written CSS and vanilla JS.

SELECTED PROJECTS

Kenshi Kaigo Japanese caregiver-certification (Kaigo Fukushima) exam prep kaigo.wyna.dev
[React](#), [Vite](#), [Supabase](#)

13 sections, 152 levels and six years of mock exams. Kanji, furigana and Indonesian reading modes on a hand-written flex ruby layout, because native ruby lets readings collide and Safari placed them differently from Chrome.

QuestPay Web3 checkout desk for creator orders kenshi-questpay.vercel.app
[Next.js](#), [TypeScript](#), [Neon Postgres](#)

Built and run solo: schema, interface, payment and release flow, production deploy.

Mellogang Visuals Studio site for a photo/video house, plus a separate ordering app mellogang.vercel.app
[CodeIgniter 4](#), [PHP](#), [MySQL](#), [vanilla JS](#)

A portfolio of film and stills, Indonesian and English copy, light and dark themes, and WhatsApp booking. The ordering app alongside it carries three access levels, OTP and OAuth login, payment checks, scheduling and PDF invoices.

Also live: kenshi-notes.vercel.app | ganga-schedule-universal.vercel.app | kenshi-downloader.vercel.app | zano-ocr.vercel.app

EDUCATION

Bachelor of Information Systems (S.Kom), ITB STIKOM Bali Graduated 2026
